Advice on healthy diets

Some types of food are good for us and some are not. How can we eat healthily? Here is some advice.

We need to eat ^{more} dairy products. It's better to drink ^{milk} regularly. They make your bones and teeth strong. It is a good idea to look for 'low-fat' dairy products.

We need to eat less fried food because it's too oily. Eating too much ^{fried food} will make us overweight. Importantly, it may cause health problems.

So let's eat well and stay healthy!

To stay healthy, balanced diet is one of the keys. We should be wise and careful to choose our food. Also, we should drink at least eight glasses of water every day. Lastly, it's vital to do regular exercises.
