A Careless Inventor

Dr. Oops was a careless inventor. One day, Dr. Oops wanted to make a robot because he wanted to make a robot to help the public.

First, he used a saw to cut the wood and made the body. Then, he folded a piece of metal to make the ears.

The Ben Robot was made of glass, metal, plastic and wood. He could not walk. Dr. Oops and Dr. Right felt very disappointed. However, Dr. Oops and Dr. Right repaired the Ben Robot and it served the public. They won a Nobel Prize. They were very excited.
