A Careless Inventor

Dr. Oops was a careless inventor. One day, Dr. Oops wanted to make a robot because he wanted to make money. First, he used a saw to cut the wood. Then, he folded a piece of metal to make ears. Next day, Dr. Oops brought the robot to visit Dr. Right. Dr. Oops said, "The robot is made of wood, metal, glass and plastic, but it could not walk."

Dr. Right said, "Sorry, you cannot use this robot to make money." Dr. Oops felt so disappointed and said, "Oops."
